

## ROTARY DRILLING RIG (WITH GEOBOR-S)

### Dando Multitec 9000

The Dando Multitec is a small footprint rotary drill rig with c.3T pulldown and 9T pullback force with a 102hp engine.

It is customised for overwater drilling by the use of triplex pump system, wireline winch and dual PTO system for ancillary tooling.

The drill system is set up to deploy Geobor-S wireline core drilling which comprises a retractable triple tube core barrel and overshot system forming a 146mm hole in order to recover high quality, undisturbed samples at 102mm diameter.

Consumables and a full system of downhole tooling are sourced from reliable international suppliers.
